

5th Inter Baltic Biogas Arena Workshop – High-value products from biogas systems

The 5th Inter Baltic Biogas Arena (IBBA) workshop will once again focus on key issues in the field of biogas. The next event will be an opportunity to learn about and discuss current state-of-the-art and future possibilities for extracting and recycling nutrients as well as other high-value products from biogas processes.

What: 5th IBBA Workshop “High-value products from biogas systems – nutrient extraction and biorefinery approaches”

Where: Poznań University of Technology, Poznań, Poland

When: August 23rd – 24th, 2017

The Inter Baltic Biogas Arena provides a platform for bringing research and industry together to discuss new ideas as well as support regional partnerships among the Baltic Sea countries. The first day of the workshop includes a speed-dating session for targeted, efficient networking as well as a dinner event with extended networking opportunities. On the second day of the workshop we will visit a waste water treatment plant as well as the pilot-scale innovative greenhouse using products out of digestate as fertilizer and as bedding material of the EU project “Food2Waste2Food”.

Become a sponsor or exhibitor at an event with international industry professionals and researchers from the Baltic Sea region! Your company’s logo with a link to the company website will be placed on the IBBA website and there will be space and time slots for presentations at the event itself. The sponsors of past events are still visible on the website in the future.

You can find the program as well as registration form on the IBBA Website www.ibbaworkshop.eu
